WindEnergy Hamburg to show its colours in Singapore: RECHARGE Wind Power Summit Asia-Pacific presents a captivating conference and expo

Hamburg, 12 March 2026 – The cooperation partnership is ready for the next round: Following the successful premiere of the RECHARGE Wind Power Summit 2025 powered by WindEnergy Hamburg at the German seaport last November, the RECHARGE Wind Power Summit 2026 Asia-Pacific powered by WindEnergy Hamburg is about to launch in the Asian metropolis of Singapore. It will take place at the Suntec Singapore Convention & Exhibition Centre on 19 and 20 May.

The partners organising the industry fair – DN Media Group’s wind energy news publication RECHARGE and WindEnergy Hamburg, the world’s leading wind energy trade fair hosted by Hamburg Messe und Congress (HMC) – are supported locally by two government agencies, Enterprise Singapore and the Singapore Tourism Board. The city state is a major regional hub for onshore and offshore wind energy that holds significant potential for the sector’s global players.

On site: market leaders and industry associations

“Numerous companies representing all segments of the value chain have secured stand spots on the exhibition floor already,” says Andreas Arnheim, Director of WindEnergy Hamburg and co-organiser of the event. Over 20 companies have committed, including market leaders such as the gearbox and drivetrain manufacturers ZF Wind Power and Yixing Huayong Motor, the pipe manufacturer Jiangsu Juxin Petroleum, and Seatrium, a leading, Singapore-based manufacturer and builder of offshore wind structures. The event is supported by key industry organisations, including the Asia Wind Energy Association (AWEA), the Association of Singapore Marine and Offshore Energy Industries (ASMI), and Bundesverband Windenergie (BWE), as well as VDMA, Europe’s largest machinery and equipment engineering association. Their leaders will seize the opportunity to network with other industry representatives to drive the development of wind energy as the most important renewable energy source.

The motto of the conference sets the agenda for the entire event: “From ambition to reality: Why Asia is wind’s next big opportunity.” The region harbours huge potential for the wind energy sector. Countries such as Thailand, Vietnam and South Korea have ambitious development plans for onshore and offshore wind energy. As for India, the nation wants to install 140 gigawatts in wind power generation capacity by 2030. There is great demand for the know-how of equipment and component manufacturers and providers of related services. Around 50 of them will be showcasing their innovative solutions in the exhibition area that serves as a gateway to a fast-growing market. “By combining an in-depth conference with an exhibition, the event delivers true value-add, not only to industry visitors but also to exhibitors and industry organisations,” says Claus Ulrich Selbach, Vice President Exhibitions at Hamburg Messe und Congress (HMC).

Conference will feature top-flight speakers

Energy demand in Asia-Pacific is growing dynamically. If the world wants to achieve its climate goals, there is no alternative to driving wind energy on a massive scale. China has demonstrated in impressive ways that economic growth does not have to be synonymous with more CO₂ emissions. At the conference, experts from politics, business and science institutions will discuss the perspectives for wind in the APAC region. Yet, the topics are relevant for the entire world: policy frameworks, regulatory issues, cost management, financing models, innovative technologies and infrastructure development including smart grids and advanced energy storage solutions. “It’s all about cooperating across borders and building strong industrial partnerships that take wind energy in the APAC region and beyond to a new level,” said Andrew Lee, Corporate Power Editor at RECHARGE and co-host of the Summit.

About the RECHARGE Wind Power Summit 2026 Asia-Pacific powered by WindEnergy Hamburg

The conference and expo takes place in Singapore on 19 and 20 May 2026. Following the successful launch of the cooperation partnership between DN Media Group’s news publication RECHARGE and Hamburg Messe und Congress, organisers of WindEnergy Hamburg, at the RECHARGE WindPower Summit in Hamburg last November, the event is now taking the next step by moving into the fast-growing APAC region. More than 40 top-flight speakers, 1000 conference participants from around the world, and around 50 exhibiting companies are expected to attend the RECHARGE Wind Power Summit Asia-Pacific.

About WindEnergy Hamburg

From 22 to 25 September 2026, WindEnergy Hamburg, the world’s leading wind industry fair, will once again be the pivotal networking hub for experts, companies and investors from around the world: At the exhibition complex of Hamburg Messe und Congress, right in the heart of the vibrant German port city, more than 1,600 companies from roughly 40 countries will present their innovations and solutions to 43,000 participants from around 100 different nations. Covering more than 80,000 m² of exhibition floor, equipment manufacturers and suppliers representing all stages of the onshore and offshore wind energy value chain will provide a comprehensive market overview. The new Energy Storage expo area, located in a hall of its own (A2) with roughly 3,600 square metres of floor space, will put the spotlight of the flagship fair on energy storage technology. The exhibition will be accompanied by freely accessible conference sessions where top-ranking experts will address the industry’s key topics. Featuring more than 300 renowned speakers on six open stages, this free conference programme is organised by the WindEnergy Hamburg team jointly with partners, including the Global Wind Energy Council (GWEC), the European industry organisation WindEurope, the national industry associations VDMA and Bundesverband WindEnergie e.V. (BWE), and leading industry media and enterprises. Highlighting its global relevance, WindEnergy Hamburg is pleased to announce a new cooperation project: On 19 and 20 May, the RECHARGE Wind Power Summit Asia-Pacific powered by WindEnergy Hamburg will take place in Singapore.
